

# LinkingAlps

## Innovative Tools and Strategies for Linking Mobility Services for a Decarbonised Alpine Space

# The Challenge

***To make low-emission mobility easy accessible and attractive for travellers!***

***To make transnational routings with public transport across the Alpine Space available for travels !***

# The Project

INTERREG Alpine Space Program  
Priority 2 - Low Carbon Alpine Space

2019 – 2022 (33 months)

- 14 Project Partners
- 6 Alpine Space Countries
- 6 Existing travel information services/ journey planners

# The Consortium

## Travel information service providers

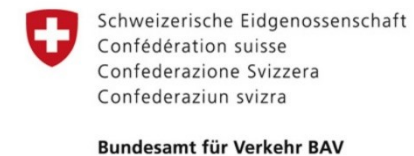

RRA LUR  
regional development agency  
of Ljubljana urban region

## Regional transport authorities

## National transport authorities/agencies

Bundesamt für Verkehr BAV

## Research organisations & consultants

Fakulteta za gradbeništvo,  
prometno inženirstvo in  
arhitekturo

# The Scope

**foster the shift** from motorized individual transport towards **low carbon transport** options in passenger transport

support the **exploitation of public transport**

# The Scope

**ease access to high-quality travel information**  
(door-to-door) across borders, operators and  
modes in the Alpine Region

provide **seamless travel chains** going **beyond**  
**the own region's** transport offers through easier  
accessible information (outside of the region)

# The Status Quo

# Our Motivators

## Motivator 1 – No Seamless Journey Planning

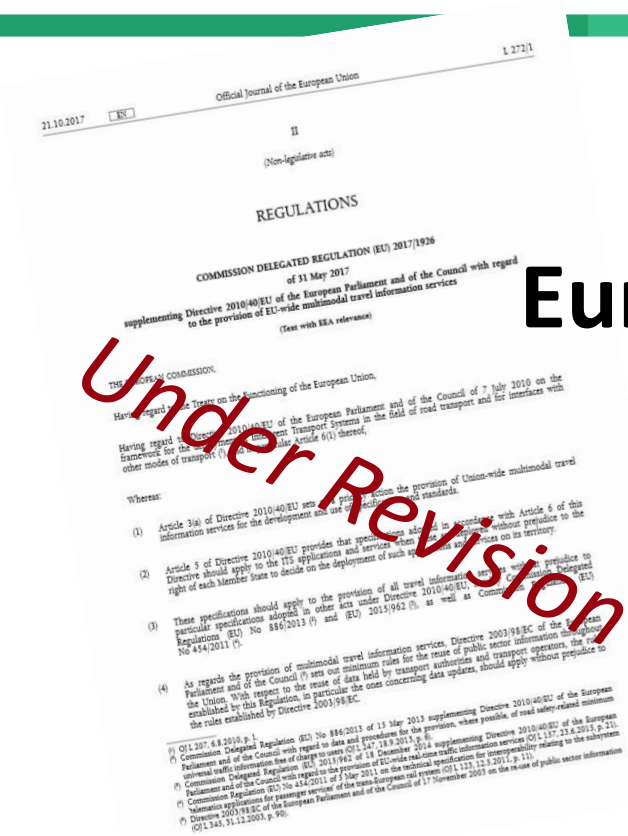

- **No universal multimodal travel information system** (cross-border, operator-spanning) for public transport, rail, alternative mobility offers
- **Isolated travel information with local or regional focus**, without cross-border and cross-operator information
- **No door-to-door routing with possible for longer journeys** (integrating long-distance transport)

# Our Motivators

## Motivator 2 – European legislation & CEN Standard for ‘Linking of Services’

**Under Revision**

*Article 7  
Linking travel information  
services*

*CEN/TS 177118 Public Transport –  
Open API for distributed journey  
planning (2017)*

*Delegated Regulation 2017/1926  
Provision of EU-wide multimodal travel  
information services*

# Our Motivators

## Motivator 3 – Missing Viable Concepts for EU-wide Travel Information

- **Data Sovereignty** concerns for Travel Information Providers as increasing hindering factor for centrally organized solutions (e.g. platforms)
- **Third party driven** innovation landscape
  - ⇒ new services are developed instead of innovating existing services

# Our Credo

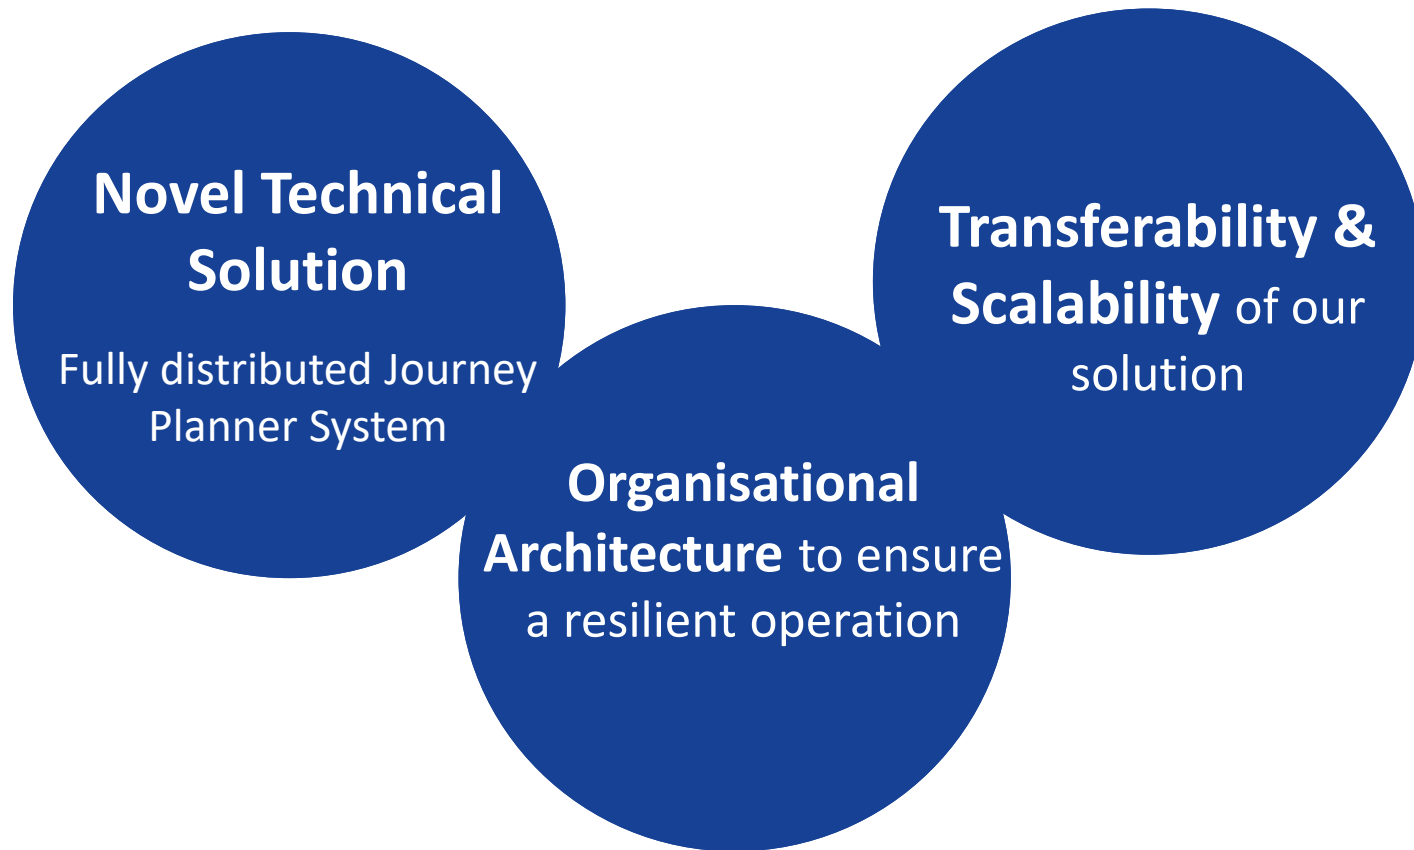

**From**  
***One serves All***  
**Towards**  
***All serve One***

# Our Key Objective

**Prepare an Operational LinkingAlps Journey Planning  
Service between CH-AT-IT-SI**

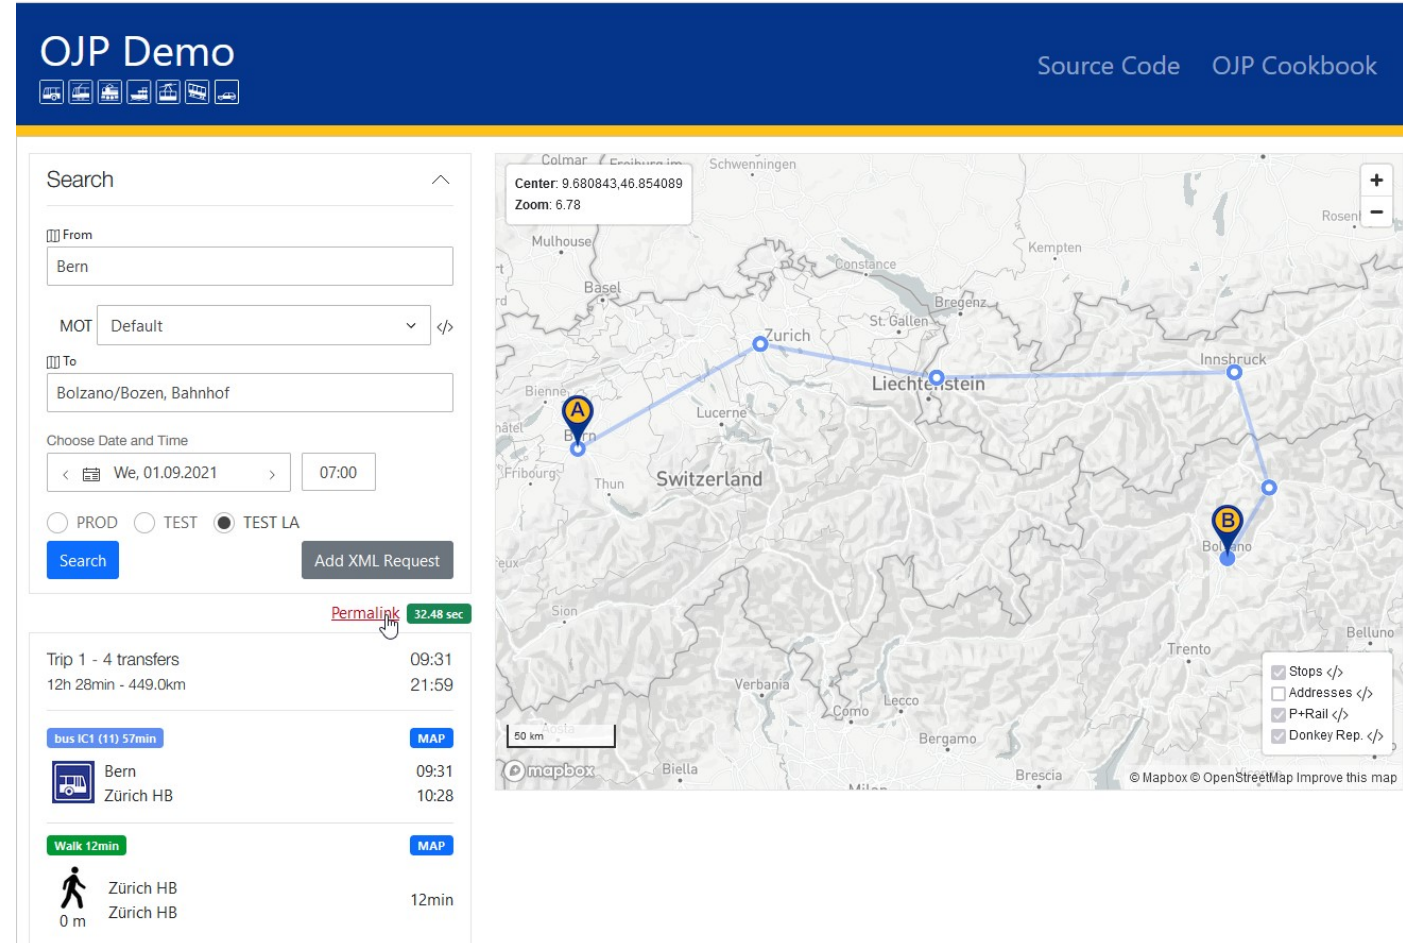

# Our Key Focuses

# Objectives & Outputs

## Technical Objectives

- **Develop a fully distributed architecture** for decentralised journey planning (major technical challenge!)
- Develop an **LinkingAlps OJP Profile** (input for EU OJP Profile)
- Integrate LinkingAlps Service in existing route planer(s)

**OJP Demo** Source Code OJP Cookbook

Map view showing a route from Bern (A) to Bolzano (B) via Zurich, Liechtenstein, and Innsbruck. The map includes a search bar with center coordinates (9.680843, 46.854089) and zoom level (6.78). A legend in the bottom right corner shows options for Stops, Addresses, P+Rail, and Donkey Rep.

# Objectives & Outputs

## Organisational Objectives

- Develop a viable **organisational architecture** a fully distributed OJP service
- **Collaboration structure** for an operational LinkingAlps Service after the project end
- Develop a **framework strategy** for the aligned and harmonised OJP deployment in Europe (in cooperation with EU-Spirit and Danube Region)

# Objectives & Outputs

## Transferability & Outreach

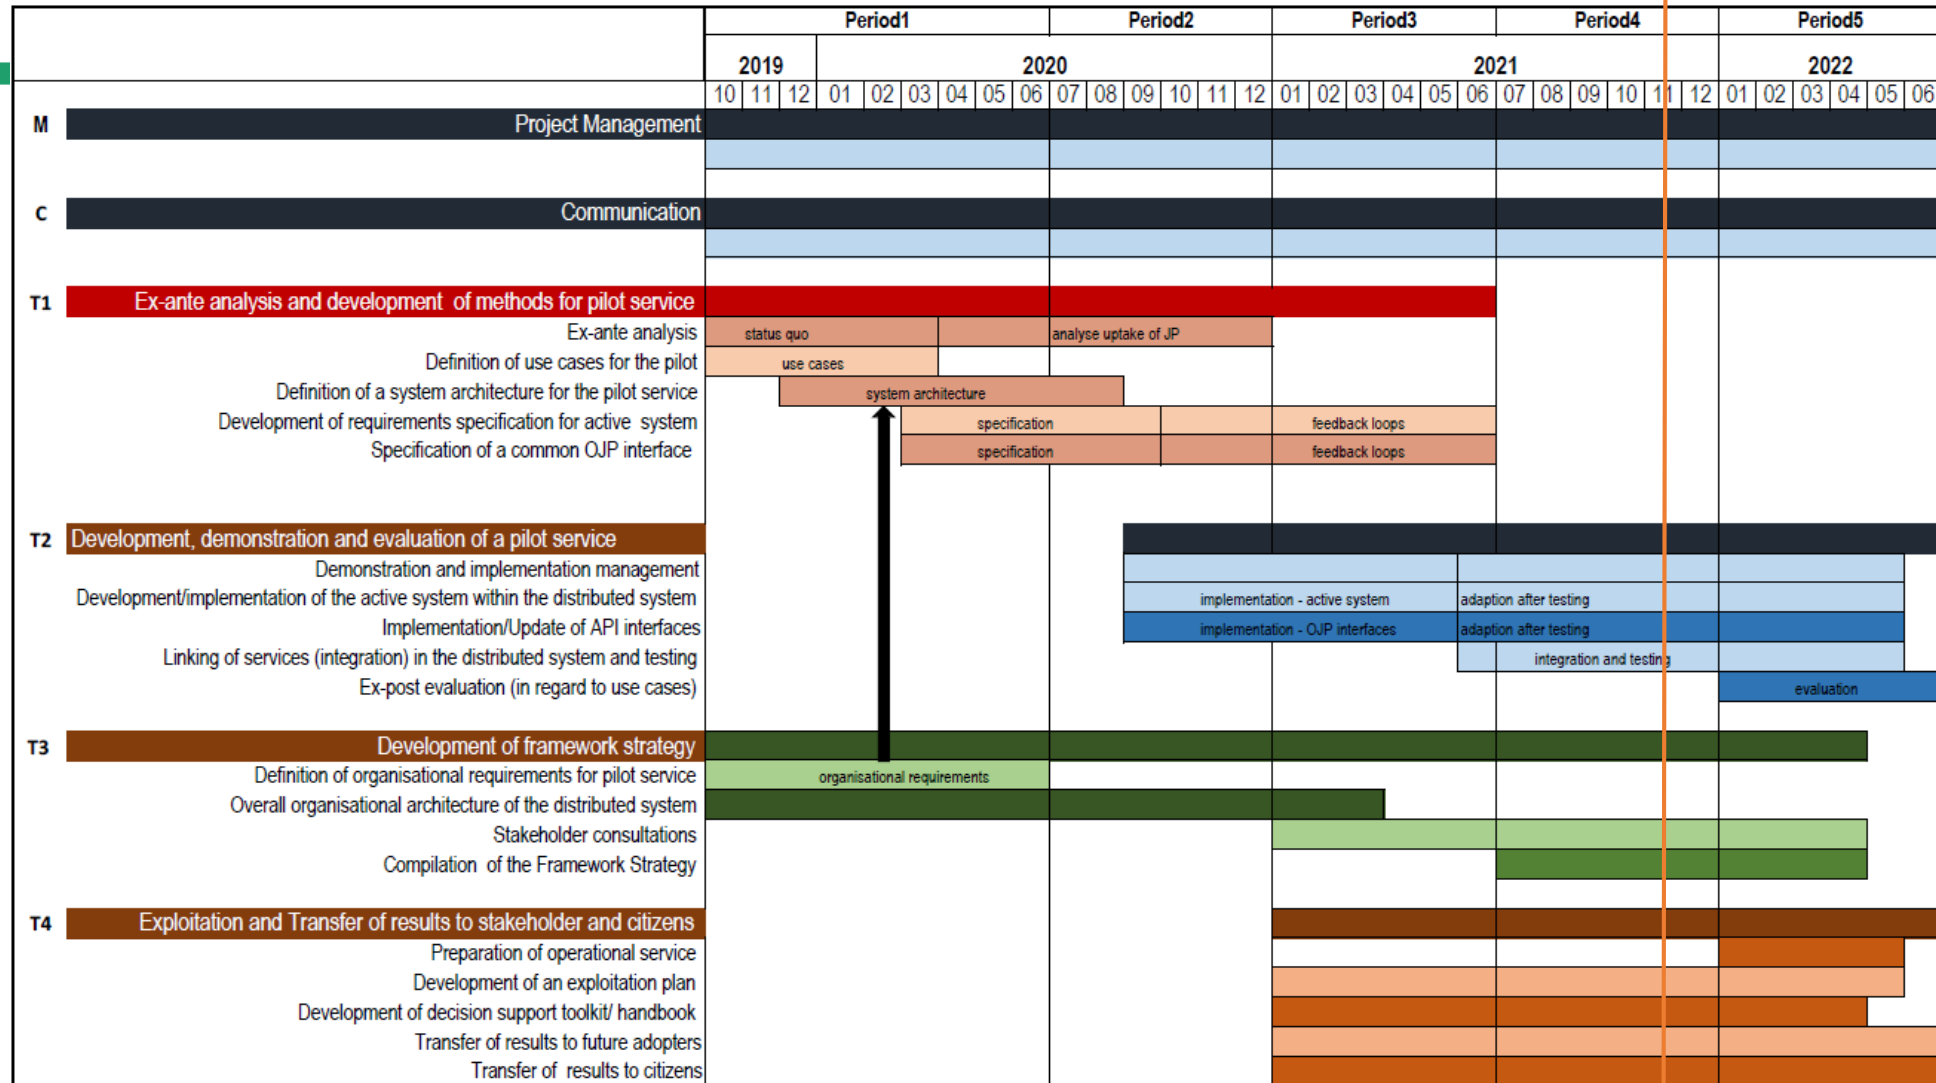

- Develop **information material** for future adopters to foster transferability, adoption and scalability
- **Raise citizen awareness** for journey planner benefits
- **Transfer** of ‘Linking of Services’ approach and learning to **future adopters**

Decision Support Handbook, Technical Blueprints, EU OJP Profile, Q&As for future adopters

# Workplan

# Project Status

## Technical Activities

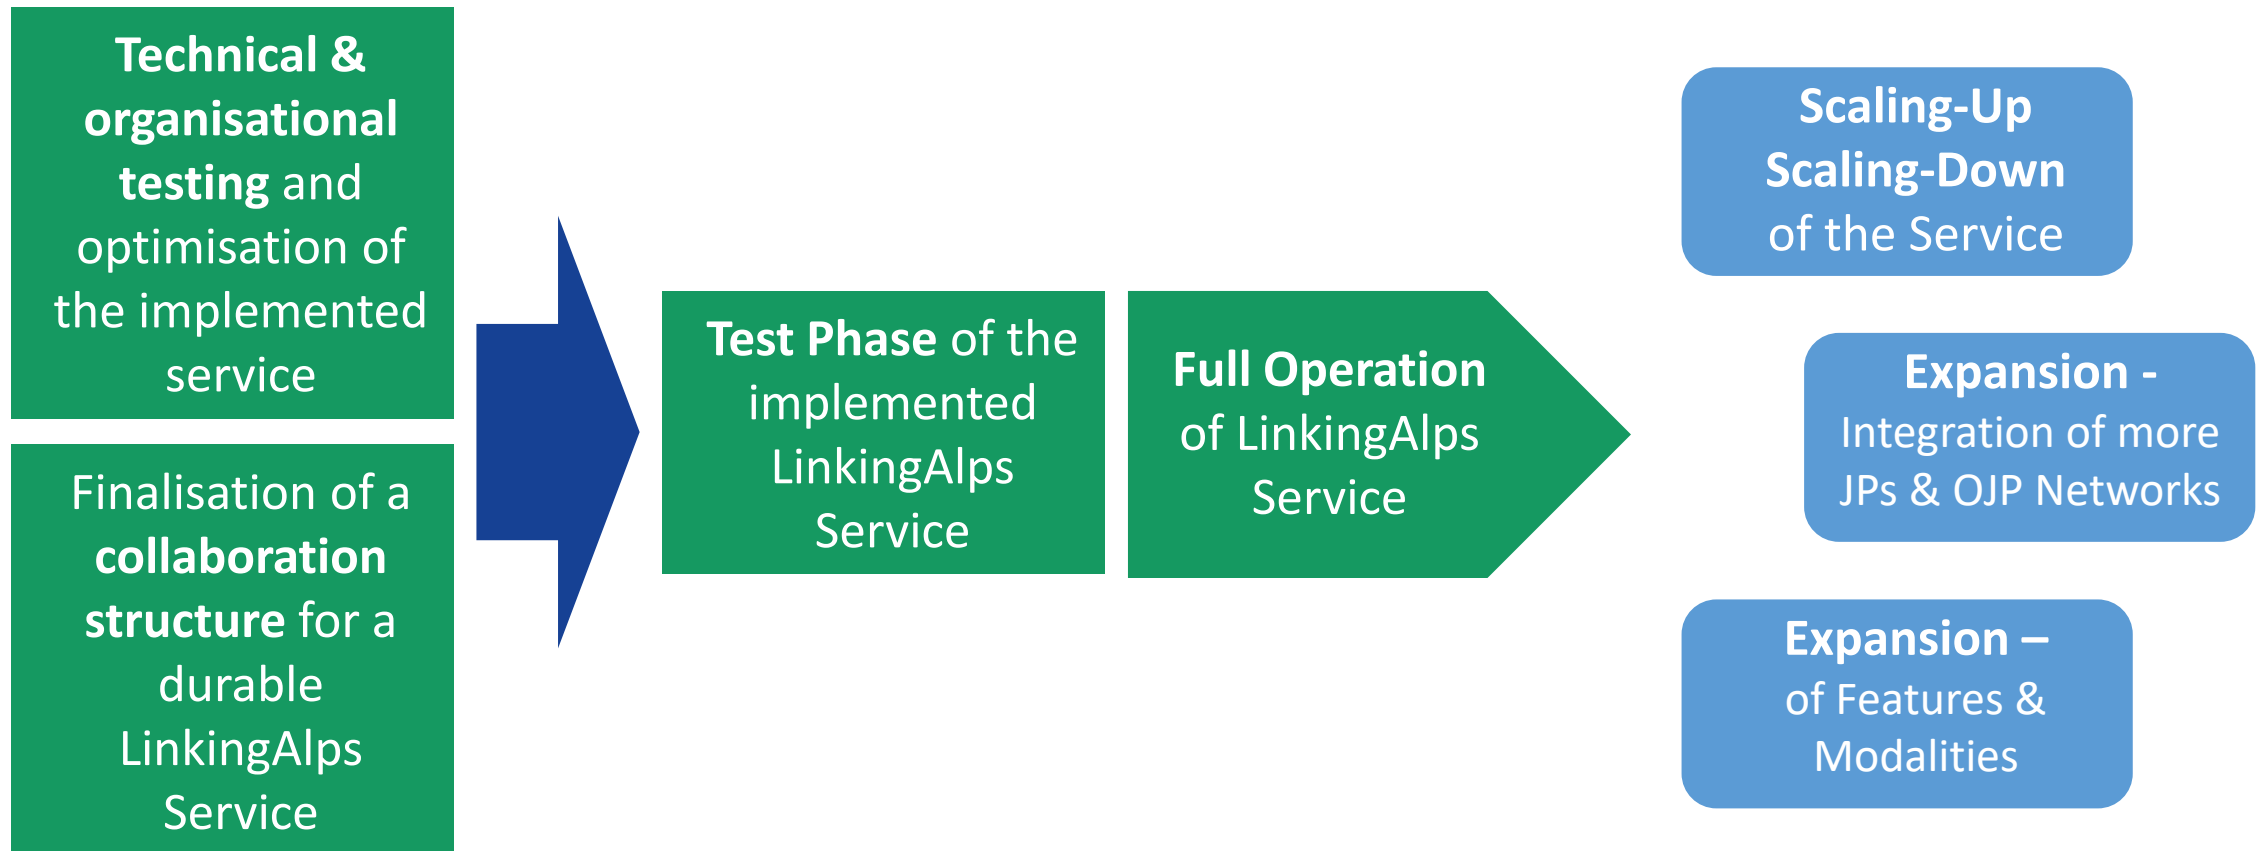

- ✓ Technical Architecture – finalised
- ✓ Technical requirements & specifications and OJP Profile – finalised
- ✓ Demonstrator of the LinkingAlps Service – final stage
- Implementation of the fully distributed service – ongoing
- Link with other European journey planning services via OJP interfaces – on-going

# Project Status

## Organisational Activities

- ✓ Development of a basic organisational architecture of the LinkingAlps Service – finalised
- ✓ Development of organisational processes – finalised
- Collaboration structure of the fully distributed LinkingAlps Service – on-going
- Organisational and cooperative framework for a Test-Phase – on-going
  
- Outreach, engagement of future adopters – ongoing
- Transfer on Knowledge (blueprints, decision-making handbook, etc.) – on-going

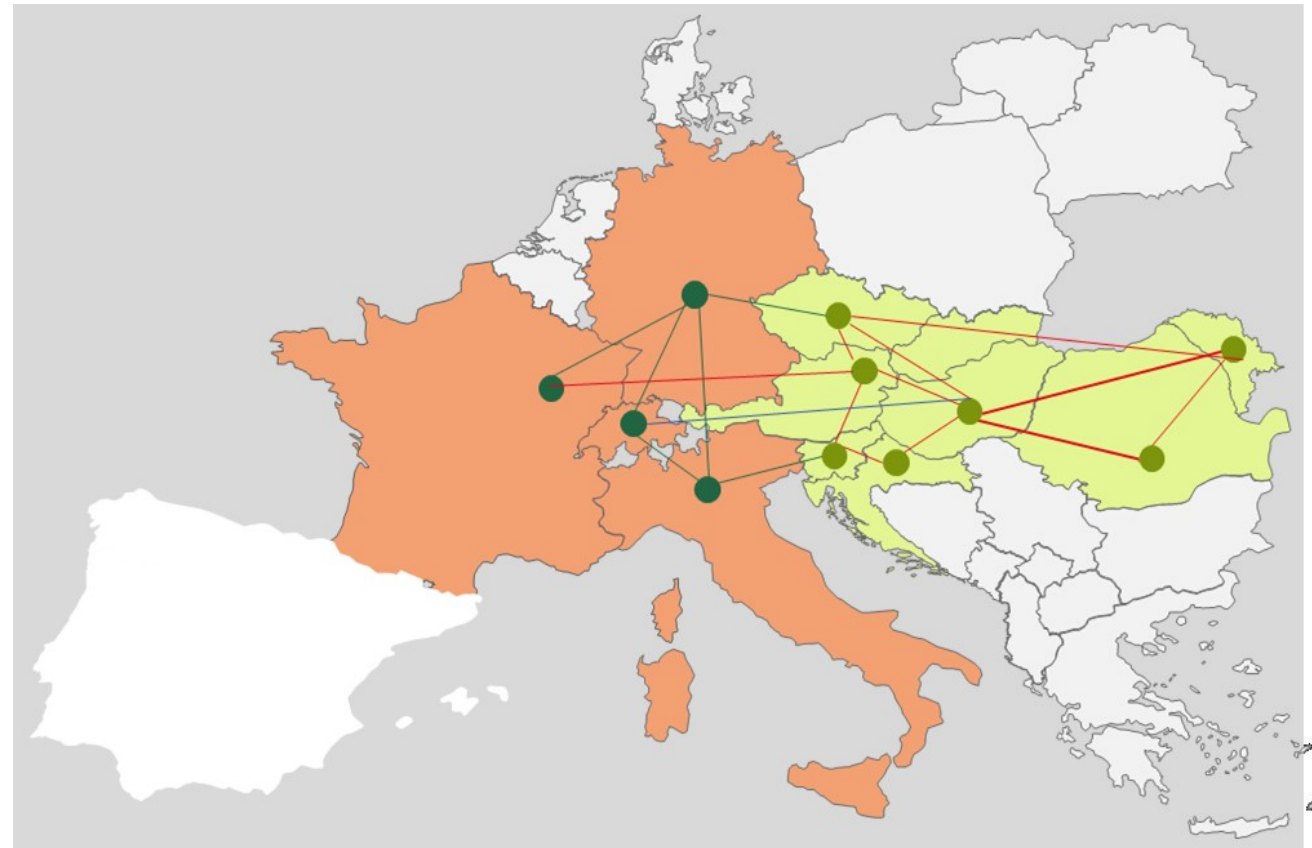

# Outlook

# Our Vision

**Strong Networking & preparation  
for collaboration with European  
OJP Networks**

# Benefits of the LinkingAlps Approach

## for the TRAVELLER

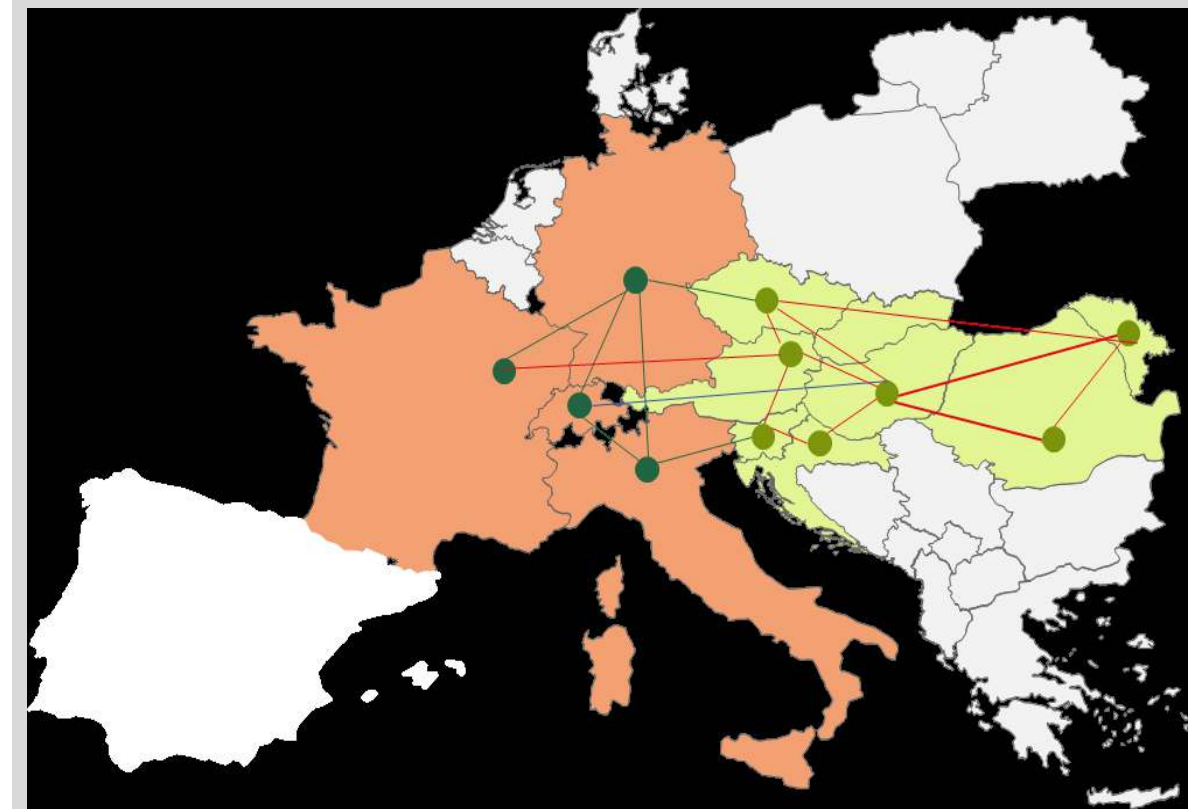

- **Simplified access** to sustainable, multimodal, seamless traveller information (across border and operators)
- Usage of **well-known JP App** of home service in the **language** of the traveller
- Information of the **highest quality and accuracy**
- Including **local transport/on-demand transport** (if available in the existing traveller information service)

# Benefits of the LinkingAlps Approach

## for the SERVICE PROVIDER

- **Sovereignty over data**
- Extension of the **range of the own system** by the coverage of all affiliated systems
- Thus, improvement of the **functionalities and quality of information** provision for customers
- **Strengthening the market position** of the local/regional service provider

# Benefits of the LinkingAlps Approach

## for the MOBILITY SYSTEM

- **Supporting the sustainable mobility behavior of travelers**
- **Strengthening of the market position of small-scale / regional providers and regions** (vs. central, international platforms)
- Strengthening the **accessibility and connectivity of rural areas**
- Solution for **last / first mile issue**

# Thank you for your attention!
