Interreg Europe: an accelerator for regional development

At the heart of EU cohesion policy:

- Improving regional development policies (in particular Structural Funds) through exchange and transfer of practices
- Mix of more and less advanced regions
- High participation of peripheral regions

Why the Policy Learning Platform?

- To **keep the results alive** after the end of your project
- To **make them available** to other policy makers in Europe
- To take inspiration from others

Ultimately: to have a shortcut to **deliver better policies**, through continuous learning and sharing information with like-minded practitioners of regional development
