P

More frequent and intense summer heat waves greatly reduce people's health and well-being.

A

P

More extreme, sudden rainstorms increase flash flooding in cities and near rivers.

A

P

Longer and hotter summers cause water shortages in rural areas and put agriculture at risk.

A

P

New roads fragment forests, endangering hoofed animals and pollinators attempting to cross them.

A

P

Overuse of intensive agricultural methods makes the soil dry and infertile.

A

P

Channelizing rivers to build railroads harms fish populations and makes rivers more dangerous during storms.

A
